DETAILED ACTION

1. Acknowledgement is made of the amendment received on 04/19/09.

Response to Arguments

Double Patenting Rejection:

2. Applicant's arguments: The present application is different than US Patent 7,139,302, as claim 1 refers to a staggered Manchester code not found in the claims of US Patent 7,139,302. Notwithstanding, a terminal disclaimer was previously filed (5/21/07). An authorization to charge account is provided herewith.

Examiner's response: The double patent rejection over (US 7139302) has been withdrawn.

Rejection of claims 1-15 are under 35 U.S.C. 103(a)

Applicant's arguments, with regards to rejection of claims 1-15 are under 35 U.S.C. 103(a) as being unpatentable over Raghavan et al (US 6075810) in view of Shpantzer et al (US 20080175600) have been fully considered and are persuasive. The rejection of claims 1-15 over Raghavan et al (US 6075810) in view of Shpantzer et al (US 20080175600) has been withdrawn.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. In claims:

- (1) In claim 6, line 10, change, "the first data stream" to - - the first formatted data stream - -.

Allowable Subject Matter

4. Claims 1-15 are allowed.
5. The following is an examiner's statement of reasons for allowance: The prior art of record Takahshi (US 5469470) , Raghavan et al (US 6,075,810) and Raghavan et al (US 6148022) , both systems in Raghavan et al are directed to CDMA communications. Both generate split and null spectra of two communicated signals. Raghavan teaches the use of quadriphase signaling. Raghavan teaches quadriphase modulation by the use of I and Q quadrature signals. Raghavan is directed specifically to GPS communications where quadriphase signaling is employed using QPSK modulator. This quadriphase signaling in Raghavan is enabled by the use of 90° phase shifter 97, shown in Figures 2C and reflected in Figure 2B, during modulation. This quadriphase modulation requires quadriphase demodulation as enabled by a tracking loop using quadrature demodulators 72 and 115, as requiring a 90° phase off set signal.

Raghavan, does not teach, the first spread spectrum signal and the second spread spectrum signal respectively uniphase modulating a carrier, the uniphase

modulating a carrier, the dual spectrum signal being a uniphase dual spectrum signal, wherein, the first code formatter is an NRZ code formatter, and the second code formatter is a staggered Manchester code formatter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
